

IT'S TIME in the Netherlands

IT'S TIME in the Netherlands was spread out as three related events. First, there was a workshop at Dutch national mathematics teachers conference (de Nationale Wiskundedagen). This was conducted in collaboration with the teachers from Utrecht Stedelijk Gymnasium. This was attended by more than 30 teachers. Next, there was an online event, attended by another 15 teachers. In these events the results of the TIME project were shared. Teachers were inspired by studying the many interesting scenarios. Finally, a meeting was held with eight teachers to prepare for attending the final conference in Zagreb.

Teachers' Inquiry in Mathematics Education
